Human Computer Interaction (CIS-305)
Assignment 4: Start Building

Group member names

- Omer Mustafa
- Mubashar Hussain
- Abdullah Waqar

Q1. Write down a one-sentence statement about what the goal of your prototype is. What does it let people do?

The purpose of an Alumni Network is to foster a spirit of loyalty and to promote the general welfare among alumni.

Q2. Attach a copy of the Balsamiq prototype on which your current assignment is based.

The file name "Balsamiq-low-fid-prototype.pdf" is attached separately with the files.

Balsamiq-low-fid-Pr
ototype.pdf

Q3. Attach a PDF of your development plan (or link to shared Google spreadsheet)

The file name "HCI-Assignment-Dev-Plan.pdf" is attached separately with the files.

HCI-Assignment-De
v-Plan.pdf

Q4. Submit the URL for your prototype. If your prototype requires any special instructions to view, please include those instructions here.

A live website has been designed and developed using our low fidelity prototypes and design strategy from previous classes assignments. HTML & CSS prototype is preferred as it is production ready, easier to test responsive design, and users/stakeholders will see a much more accurate version of what they will get by the end of the project leading to more useful reviews. For better accessibility, the High-Fidelity Prototype has been deployed and made live under the link:
